For Immediate Release

Spracht Introduces Konf-X Buds™ Earset

Active Noise-Canceling In-Ear Headset with 3 MEMS Mics for Enhanced Conferencing

Palo Alto, CA – Spracht, designer/producer of wireless speakers and conference phones, announces their first headset product in the Spracht product line, the Konf-X Buds™. The Konf-X Buds™ are full Active Noise-Canceling (ANC) ear-buds with 3 MEMS Microphones for the added benefit of enhanced conferencing for voice so you are heard well on the far end.

“The Konf-X Buds™ are compact and lightweight, unlike the large bulky headphones you see people travel with on the plane. I’d much rather carry these when I travel to get the Active Noise Canceling effect,” said Gary Crock, VP Sales & Marketing for Spracht. “These Konf-X Buds™ offer a high quality, yet affordable, way to enhance your music/content experience by blocking out up to 90% of ambient noise. And when you throw in the added value of Mems Microphones for voice, they are the perfect conference-on-the-go companion.”

KONF-X BUDS™ NOISE-CANCELLING ANC HEADPHONES USE AN EXTERNAL MICROPHONE to pick up background noise and then use sophisticated electronics to cancel out the noise. To power out the noise, you need a battery compartment. Active Noise Canceling Ear Buds work well when trying to eliminate a recurring drone noise, such as in an airplane, factory, hum of servers, or other machinery.

That’s just the listening side. Spracht also includes 3 high quality MEMS Microphones so you can use this as an Enhanced Conferencing Product and BE HEARD on far end. This is a great product for business travelers who need to conference on the go.

The Konf-X Buds™ come equipped with 1 AAA battery, extra ear-tips, a carrying case, airline adaptor, cable clip, and a tangle-free cord. The Konf-X Buds™ can be used without a Battery as well in Passive Mode. The Konf-X Buds™ retail for \$79.99 and are available for purchase at www.spracht.com.

About Spracht

Spracht is derived from the German word meaning "to Speak". Headquartered in Palo Alto, in the heart of California's Silicon Valley, Spracht's mission is to help people communicate better, anywhere. Innovative designs in *Bluetooth*® and wireless products have resulted in multiple Design and Engineering Showcase Innovations Honoree Awards from CES, and a Best in Category Award for Computer Accessories. From conference phones, to wireless *Bluetooth*® speakers for music, to the ground breaking first fluid focus web cam, every product performs its function seamlessly, so you can conference and communicate better. We constantly strive to push the boundaries in product development. For more information regarding Spracht, please visit: www.spracht.com.
